Key features

- 2K, 6K, 20K, 60K and 200K full scale ranges
- High resonance frequency
- Broad frequency response
- Minimal zero shift after shock

Description

The Endevco model 7270A is a family of rugged undamped piezoresistive accelerometers designed for shock applications. The model 7270A features minimal mass loading, broad frequency response, and minimum zero shift during a shock event.

The 7270A uses a unique micro-machined, piezoresistive sensor with gages arranged in a full wheatstone bridge circuit. The extremely small size and efficient construction allow for exceptionally high resonant frequency. The flat, lightweight case is designed to reduce the effect of case resonance for optimal frequency response.

200,000g range is subject to International Traffic in Arms Regulations (ITAR), and as such a license is required for shipments outside the U.S. and other restrictions may apply.

All specifications are referenced at $+75^{\circ}F$ ($+24^{\circ}C$) and 10 Vdc, unless otherwise noted. Calibration data, traceable to National Institute of Standards and Technology (NIST), is supplied.

Accessories		
Options	Description	
EH137	[2] 4-40 high strength screws	Included
EHW265	[2] No. 4 washers	Included
7970	Triaxial mounting block	Optional
K7270AM6	Mechanical isolator conversion kit	Optional

Options	
Options	Description
M4	1/4 - 28 stud mount package
M6	Enclosed in mechanical isolator with 1/4 - 28 stud
M7	Ruggedized with low noise cable
M16	Calibrated at 5V excitation
M26	Calibrated at 3.3V excitation
-Z	Fixed resistors only

Notes

- 1. Sensitivity measured at 5,000g, except for 2,000g model measured at 2,000g
- 2. Operating temperatures above 93C (200F) result in unpredictable thermal zero shift. TZS should be monitored and/or managed by auto-zeroing to insure no loss in data due to signal saturation.
- 3. 150°F is the maximum recommended operating temperature with 10 Vdc excitation. In applications requiring higher operating temperatures, lower excitation voltage is recommended.
- 4. Maintain high levels of precision and accuracy using Endevco's factory calibration services. Call Endevco's inside sales force at 866-ENDEVCO for recommended intervals, pricing and turn-around time for these services as well as for quotations on our standard products.
